If you want buy single screws instead of kit, you can use the official Trident sourcing guide [here](#)

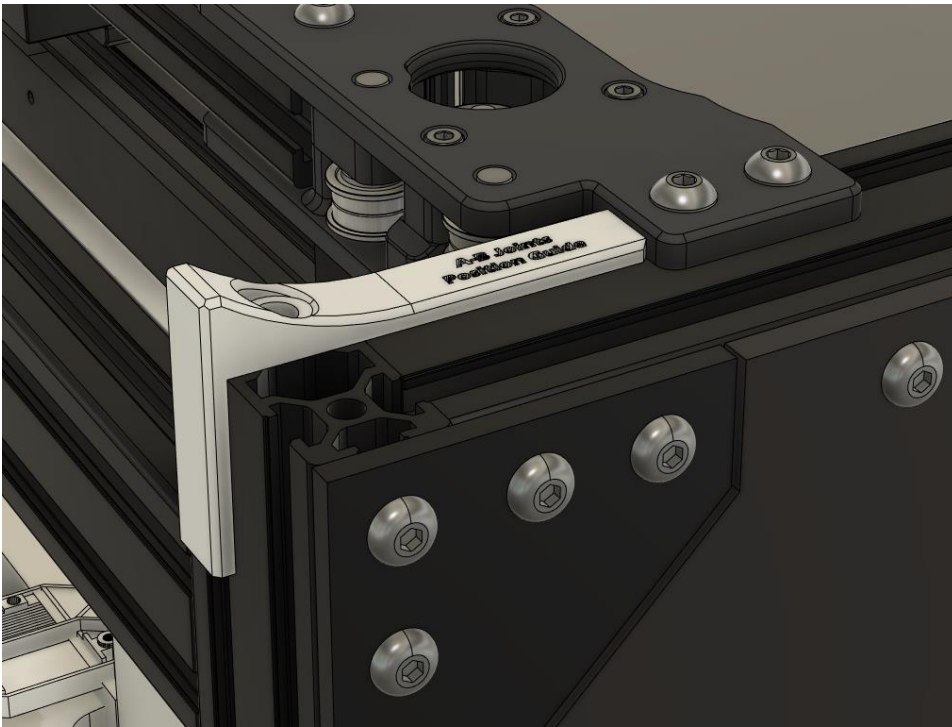

NOTE 1: this BOM is related to the conversion from BLV to TNT only.

NOTE 2: this BOM not include part list about toolhead (extruder/Cooling ecc), you can choose between mobius,clockwork,galileo,clockwork2 ecc, be careful about the kind of MGN is designed for.

NOTE 3: this BOM not include leveling probe, you can choose all kind of probe compatible with voron carriage

Use of A-B Joints positioning Jig

- 1) Set the correct distance between the back end of the frame and the A-B Joints

- 2) Set the correct shifting length (30mm down) of the back frame 2040 profile.
